**TD-20U**

Optex wireless 2000 rc-20u manual.

Gates & Fencing Gate Operators Gate Hardware Access Control Safety & Sensors Power & Wire Traffic Control Replacement Parts DIY Learning Center Page 2 CHIME BOX W/RELAY RECEIVER RC-20U INSTALLATION INSTRUCTIONS Please read this manual carefully before installation. 1 CAUTION AND WARNING WARNING 1. Harsh environments Do not use the RC-20U outdoors, severe conditions as out of warranted temperature, rapid temperature change, high humidity, or steam. This may cause the unit to malfunction. 2. Tampering Any changes or modifications not expressly approved by OPTEX could void the user's authority to operate the equipment. 3. Adaptor Do not use any other AC adaptor except what is included. 2 PARTS IDENTIFICATION Zone indicator 1 Zone indicator 2 Zone indicator 3 Switch 1 Power indicator Power Switch Switch 2 Speaker Adaptor Jack FRONT Note: When you recycle this product, please disassemble product and recycle according to state law. 4 INSTALLATION Use the mounting screw on a wall. Leave some length of the screw out for mounting hole of the RC-20U. Terminal connection Any device with a zero voltage input terminal can be connected to this terminal. This may include electronic locks, emergency sounding Remove the connection devices, and automatic terminal cover reporting equipment. 6 TEACH TRANSMITTER CODES TO RC-20U "LEARN MODE" Each transmitter has a unique transmitter code which can be automatically learned by RC-20U. The RC-20U's zones must be taught to respond to the appropriate transmitter. (No transmitter is taught on default setting.) Activate "LEARN MODE" A) The RC-20U automatically starts in "LEARN MODE" if no transmitter code has been programmed. B) Press and hold switch 1 until the power indicator starts to flash, Note: - Verify that each transmitter has been successfully learned by RC-20U by triggering them. - Each zone can learn max. 3 transmitters. - Zone indicator shows the activated transmitter by the number of flash. (e.g. If learned second transmitter in zone 1 is activated, zone 1 indicator flashes twice.) - Single transmitter cannot be learned by multiple zones - RC-20U learned code will keep memorized even if turning OFF the power. 2000 Mounting hole Connection terminal cover Stand Output connection terminal (Inside of the cover) BACK Desktop Pull out the stand on the back of the RC-20U and place it on any flat surface. Use the terminal marked "COM-N.O." for N.O. devices and "COM-N.C." for N.C. devices. Zone 1 OR Receiver starts in Zone 1. FEATURES - Compatible with TD-20U (Indoor/Outdoor Sensor Transmitter), TS-10U (Hand-Held Transmitter), TR-20U (Repeater), TC-10U (Door/Window Transmitter) and any transmission units of WIRELESS1000 series. - Identifies 4 zones by 3 different tones and LED lights (3 normal zones + 1 continuous zone). - Able to learn 12 transmission codes (Each zone can learn 3 transmitters maximum). - Automatic "Learning" function facilitates to preset transmission codes to RC-20U. - Over 8 million codes possible, eliminates interference from neighbors. - Latches into alarm with "Continuous mode" function. - Programmed "Utility Output Mode" to inactivate chime tone (applicable for zone 3). - Adjustable duration for terminal output. - Adjustable volume. - Low battery indicator to recognize transmission units' battery status. - Powered by a 9VDC adaptor(Included). CAUTION 1. Impact/Shock Impact or Shock can cause severe damage or break the RC-20U. 2. Electric Devices Use RC-20U at least 3ft (1m) away from electronic devices such as TVs, Radios, PCs, Microwave ovens, or any other devices with an electric motors. This may cause the unit to malfunction. 3. Transmission range Transmission range may decrease under the following conditions: - Either transmission units or RC-20U installed on a metal surface. - Presence of a steel door, reinforced concrete or other metal obstructions between transmission units and RC-20U. - Places near strong radio sources such as broadcast stations or substation. 4. Cleaning Harsh cleaners such as paint removers or benzene may ruin the surface. Use a soft wet cloth and mild soap to clean. Function Activating "LEARN MODE" and Switch 1 "TERMINAL OUTPUT DURATION MODE", Activating "VOLUME ADJUSTMENT Switch 2 MODE" and making selection. AC Adaptor Mounting screw Remove knockouts Close the connection according to wiring terminal cover. needs. Teach the transmitter code to RC-20U Activate the transmitter you wish to teach the receiver. ( The corresponding zone indicator flash rapidly at interval's of 1 sec according to the related transmitter. Zone 2 Zone 3 Press switch 2 to advance to the next zone and chime sound. Erasing codes from RC-20U's memory. 1) Hold down switch 1 until the power indicator starts to flash. 2) Press switch 2 until the appropriate zone indicator is lit. 3) Press switch 1 to erase. The zone indicator will start to flash. (Note: All programming in that particular zone will be erased.) 4) Press switch 2 a few times until the power indicator stops flashing and remains lit. Erasing all codes from RC-20U. (Return to the factory default) To erase all programming, turn on power while holding switch 1. 3 TRANSMISSION RANGE (REFERENCE) Transmission range must be changed according to environment. Please check if system works properly for the site. In the case of insufficient transmission range, use TR-20U (Repeater unit) to extend range. Sensor unit 2000ft (Open field, line of sight) TD-20U 150ft (Stucco/Plaster construction) 100ft (Concrete construction) Repeater TR-20U Contact unit TC-10U 1400ft (Open field, line of sight) 150ft (Stucco/Plaster construction) 100ft (Concrete construction) Button unit TS-10U 5 POWER CONNECTION Use only the power adaptor supplied with the product. Zone 4 Operation Status (Special/ refer 8 ) Press switch 2 to return to normal operation status. Receiver/ Repeater RC-20U/ TR-20U Normal Light Blink OPTEX, the global leader in sensing solutions, is pleased to announce the new InSight Visual Verification PIR Camera Series, an innovative PIR-based visual verification security solution for outdoor applications, combining highly effective OPTEX sensing technology with a camera.
